PRO COMP SUSPENSION

Suspension Systems that Work!

INSTALLATION INSTRUCTIONS

Part # 57001 COIL SPRING

⇒ **Purchaser and Installer Notice**

Explorer Pro Comp coil springs are engineered for Pro Comp Suspension systems exclusively. Using Pro Comp coils on other manufactures suspension kits may result in inconsistent ride height, cause alignment problems and/or premature coil failure. For this reason Pro Comp coils installed with any other system other than the applicable Pro Comp system will void any and all warranty.

⇒ **Installation Safety Warning Notice**

Removal and installation of coil springs can be very dangerous due to the enormous amount of energy stored in a compressed coil spring. Factory service manual tools and procedures are mandatory when removing or installing any coil spring.
