Hammock Hanging Instructions

1. Find two trees or mounting posts that are between 10-15 feet apart. **(Ideal distance is 12-15 feet)**
2. Wrap the first strap around the tree or post. Then, put the end with several loops through the single loop end.
3. Repeat step 2 on the other tree or post.
4. Grab the hammock, then attach the carabiner to one of the two straps. Then attach the carabiner on the other end of the hammock to the other strap.
5. There are several loops on the hammock attachment side of the strap. This is to allow for adjustment. You can adjust the hammock height by moving the carabiners to different loops until the height is to your liking.

Hammock Maintenance

- Always inspect the hammock prior to use.
- To clean your hammock, stretch the hammock out on a clean worksurface. Then, clean using just soap and water. Do NOT use any abrasive chemicals or products that contain bleach. You can use a soft brush to help agitate and remove dirt. When finished cleaning, be sure to wash out all soap, then hang until completely dry.
